PRE-START DO’S AND DONT’S

by Dave Perry
September, 2009
Three Phases of the Pre-Start...Some General Do’s and Don’t’s

The Entry

**DO**
- One minute loops max in final 2:00
- Tactician say “we're in”
- Blue – say your first move

**DON’T**
- Be Early
- Be too late (more than 5 seconds)
- Yellow – don’t get stuck on anchor line
- Yellow – don’t go for Blue before crossing line

First Meeting – Dial Up - Yellow

**DO**
- Begin Dial Up 3-4 lengths from Blue
- Slow down approaching Blue (jib, main, rudder)
- Use steering to settle into final position (bow at Blue’s mast; one length gap)
- Sail on starboard if Blue goes to port with tack or gybe
- Stay on same ladder rung and mirror Blue, if separating on opposite tacks

**DON’T**
- Let Blue cross, up or down
- Overtake Blue in Dial Up
- Tack away before Blue is stopped
- Go backwards
- Tack in front of Blue if Blue tacks or gybes

First Meeting – Dial Up – Blue

**DO**
- Try to cross (up or down)
- Slow down approaching Yellow (jib, main, rudder)
- Get as close to Yellow as possible without risk of foul; get parallel
- Get to close-hauled quickly in medium/heavy breeze
- Keep Yellow under pressure
- Pick one of the four possible exits (follow Yellow on port; sail close-hauled and tack; bear off and gybe; steel balls) – be patient

**DON’T**
- Try to cross down when close – take the Dial Up
- Go into Dial Up fast, unless move is to sail close-hauled or go right into a gybe
- Wait too long to turn up into Dial Up
- Sail on starboard tack between close-hauled (fast) and ddw (with main pinned)
**First Meeting – Downwind Cross – Yellow**

**DO**
- Keep your speed
- Gybe just before Blue's centerline

**DON'T**
- Get slow or too deep an angle
- Gybe into a locked to windward position, i.e. gybe too soon

**First Meeting – Downwind Cross – Blue**

**DO**
- Keep speed
- Take the Dial Up if close, even if a close cross
- When Yellow gybes, stay DOWN; do not head up at all
- If Yellow gybes in close behind, gybe and circle immediately

**DON'T**
- Try to cross if not 100% sure you will make it
- Head up at all after crossing Yellow

**First Meeting – Upwind Cross – Yellow**

**DO**
- Tack to leeward or astern (light air) of Blue

**DON'T**
- Tack too soon (letting Blue bear off and get astern of you)

**First Meeting – Upwind Cross – Blue**

**DO**
- Go close-hauled immediately after crossing the line
- Look for Yellow to tack too soon (letting you bear off and get astern of Yellow)
- Press over Yellow (put downward pressure on jib sheet)
- If under pressure, sail to windward of RC boat, go another 10 seconds, and STOP htw

**DON'T**
- Bear off to sail astern of Yellow unless 100% sure you can make it

**Middle Phase – on starboard tack – under pressure (can’t tack or gybe)**

**DO**
- STOP! (spin hard htw; main full backed, etc.)
- Be active (lots of Ups and Downs)

**DON'T**
- Do nothing
- Sail straight for more than 10 seconds MAX (unless sailing close-hauled to tack, or heading to right of RC boat)
Middle Phase – neutral (both boats can tack or gybe)

DO
- Get to right of RC boat and begin circling
- Always get off starboard as quickly as possible, and extend and build speed on port tack
- Each time on port, ask: too early to lead?
- When in doubt, lead...
- GYBE into the lead with a safe margin
- Tack into the push unless already high in the starting area

DON’T
- Sail on starboard unless turning quickly to port, or leading to start
- Gybe in to windward of other boat
- Get too deep in starting area unless trailing other boat
- Get too slow; build speed on port tack
- Push when late or deep
- Get a Penalty for gybing too close!!!

Final Approach – Pusher

DO
- Push from High in the starting area
- Push from Above to get high in the starting area
- Be an active pusher (lots of Ups and Downs) to get out of phase with Leader
- Look to go over the top of Leader if Leader gets too low
- Look to Hook (overlap Leader to leeward) when Leader is Up and you are Down
- Hook when Leader is early to line or you want Left
- Use “5 second rule” when Hooking
- Shift Right (get locked to windward of Leader) when Leader is early to Pin or you want Right
- Shift Right when Leader is Down

DON’T
- Follow the Leader low into the starting area!!!
- Push when near close-hauled
- Be a static pusher
- Shift Right (get locked to windward of Leader) too soon
- Hook too late
- Let there be contact within first 5 seconds of Hooking Leader
Final Approach – Leader

DO
• Lead from Low in the starting area
• Skipper look aft at Pusher's bow at all times!
• Stay in phase with Pusher's Ups and Downs, especially Downs
• Round turn up as pass layline to Boat
• Protect from being Hooked, until happy to be hooked
• When appropriate, Shift Right, then linger past head to wind until ready to start on port tack
• Avoid Pin layline (Shift Right before getting to Pin layline)

DON'T
• Lead from High in the starting area
• Let Pusher sail over the top of you, unless you want to become the Pusher
• Get Hooked too soon (be Up when Pusher is Down)
• Get too close to Pin Layline
• Get a Penalty for delaying your luff if you get hooked!

Final Approach – Both

DO
• Get off the starting line at roughly the same time as the other boat

DON'T
• Start on same tack unless Windward with a Gap, or a Crush
