RACING TACTICS

Race and Win

It takes more than great speed to win races. The North U Tactics Webinar teaches racing strategy, tactics and rules with an emphasis on practical, straightforward ideas that will help you win. Learn the latest in racing tactics in an interactive multi-media format. Hundreds of tactical scenarios play out in full motion.

Topics include starting tricks to keep you in control, strategy when you know what the wind will do, and when you don't, priorities in mixed fleet racing, and breakthrough insights on downwind wind shifts.

You'll learn how to tell if you're tacking too much, when to split and when to cover, key differences between reaching and running tactics, how to avoid sailing into corners, come-from-behind tricks, and more.
