RACING TIPS & TRICKS

Highlight Reel!

Less structured than the Trim or Tactics programs, our Tips & Tricks Webinar combines highlights from all our programs in an engaging, high energy format that can be customized on the fly to suit the audience. Highly interactive, this two-hour program uses a case-method to explore the essentials of racing success.

Nuggets!

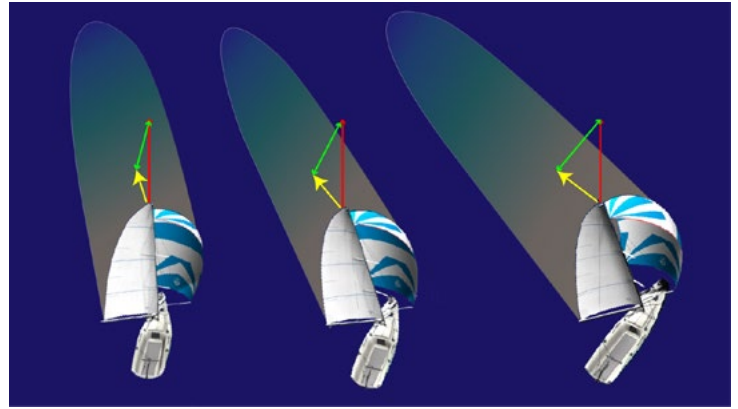

The differences between a mid-fleet result and a podium finish are small but critical details. A little bit here, a little bit there; it all adds up. In the Tips & Tricks Webinar we explore fundamental principles and nuanced techniques of boat handling, boat speed, and tactics to lift you to the podium: Spinnaker jibes without a collapse, the cause and cure for twists and wraps, changes in trim and helming from waves to smooth water, windshifts upwind and downwind, strategic positioning in current, tactical positioning for clear air and freedom to maneuver, good starts every time... Fine tuned to your venue and your sailors.

Bill Gladstone!

Your Tips & Tricks Webinar leader is North U Director [Bill Gladstone](#). Champion racer and veteran coach, Bill is the creator of the North U Tactics and Trim programs. Graduates of his seminars, webinars, and clinics are winning races the world over.
